

Description and Operation

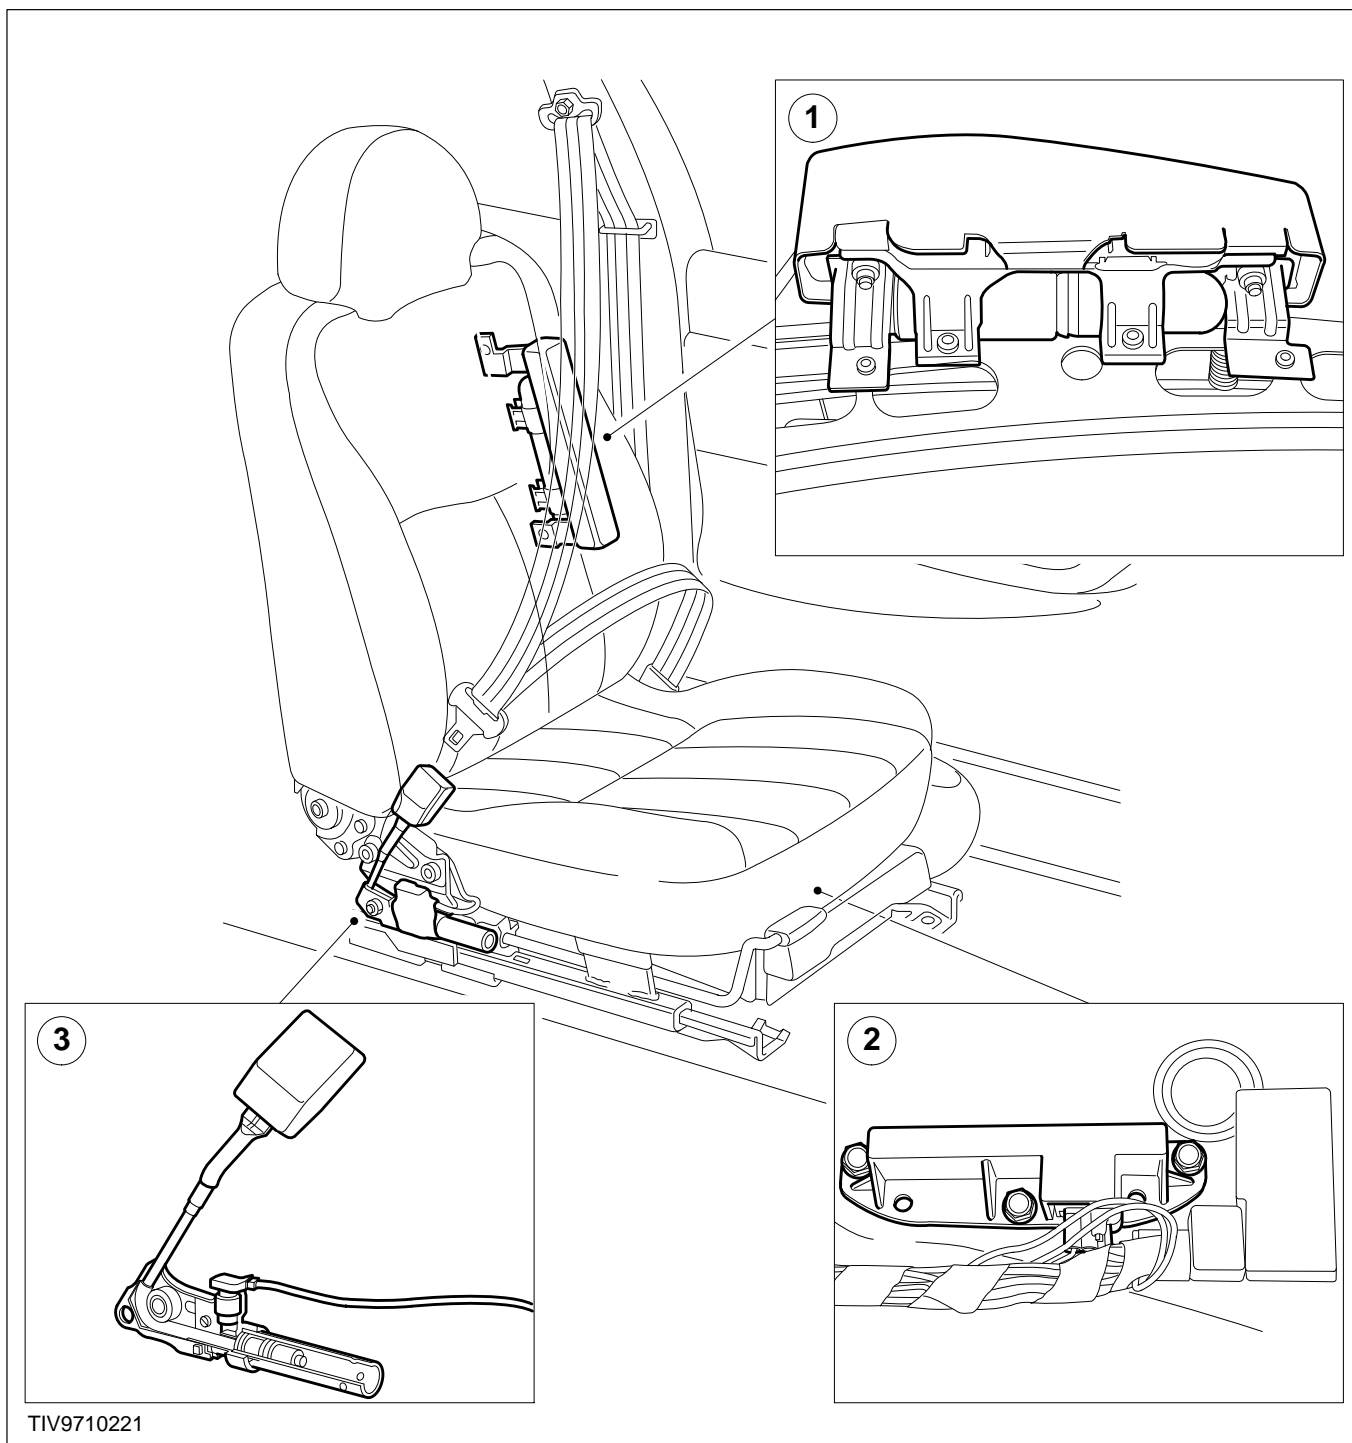

Front Seats

Seat substructure is identical to Mondeo models. All high series front seats feature a lumbar support which may be adjusted manually or electro-pneumatically depending upon level. High series seats have a 12-way adjustment including longitudinal, height of thigh cushion, seat height, lumbar support, backrest tilt support. High series seats also have three programmable memory presets. The memory is non volatile and hence is not lost when the battery is disconnected.

 **WARNING:** Under NO circumstances should accessory seat covers be used with seats equipped with side air bags.

From 98½ MY Scorpio variants equipped with both driver and passenger frontal air bags, offer as an option SIDE air bags. The side air bags are integrated within the front seat backrests, provide an unobtrusive appearance.

In the event of the vehicle being subjected to a severe side impact, the side air bag on that side is deployed. The seat cover on these seats are unique incorporating a specially designed stitched seam which separates under the force of the deployment.
